CCTV Cameras

At TTM we offer an array of high quality IP cameras from the Hikvision range. From dome to bullet style these vandal proof cameras offer high security and 24 hour monitoring for sites of any size

- + High quality definition
- + Scalable to site needs
- + Vandal Resistant
- + 24 hour security

CCTV Recording

The Hikvision Turbo HD DVR Range features HD-TVI technology to bring 720P and 1080P resolution. The Hikvision Turbo DVRs are compatible with traditional analogue cameras as well as HD-TVI, meaning legacy analogue installations can utilise existing cameras as well as the Hikvision range. Our systems can also be set up for remote monitoring via off site computers and mobile devices

- + Legacy coax or cat5 cabling
- + HD-TVI technology
- + 720P and 1080P resolution
- + 4, 8, 16, 24 or 32 channels
- + Optional remote monitoring

Disabled Refuge

Our range of disabled refuge devices fully complies with BS5839-8 and BS5839-9. This range consists of the Res-Q and the Res-Q NET, both designed to enable people with disabilities to communicate with fire officers in the event of becoming trapped in an emergency, and the Call Assist Toilet Alarm that can be used stand-alone or wired into a Res-Q master panel.

- + BS5839-8 and BS5839-9 compliant
- + Easy use
- + Intuitive design

Pager Systems

The Scope GEO range of POCSAG radio pagers assure you of the highest quality products at the best possible prices! Simply choose the model that best suits your application. All GEO pagers feature tone & vibrate options, time and multiple message memories.

- + Hard wearing
- + Multiple message memories
- + Designed for simple easy use
- + Up to 8 line display
- + Storage for 60 messages, up to 20,000 characters

Nurse Call

Patients and staff can relax in the knowledge that should help be required, either by the patient or by a member of staff, assistance can be directed to the specific room at the touch of a button.

We have the simple 600 & 700 series and the more advanced touch series both of which offer easy communication ensuring the smooth running of hospital and care facilities.

- + Used by NHS trust, residential care homes and nursing homes across the UK
- + Reliable stable system
- + Requires little to no maintenance
- + Manufactured in the UK

Touch Series Nurse Call

Staff Attack Alarms

Red Alert helps staff feel more secure knowing that in an emergency they can summon assistance at the touch of a button on their personal transmitter.

This system has been designed to give staff the flexibility to remotely activate an alarm using an infra-red transmitter commonly used by medical staff as a personal attack alarm system as well as for medical emergencies.

- + Sturdy design
- + Up to 20 character display
- + 4 levels of urgency
- + Used throughout the UK and internationally
